

# For Getting Out Fast.

Sterling Rope announces a new innovative escape device that gives firefighters an advanced, yet simple tool for emergency egress. The F4's sleek, lightweight design (6 oz) is certified with Sterling's escape ropes, such as the FireTech 32™. It is engineered to allow easy horizontal movement. The auto-locking feature adds security and confidence for a hands-free exit of a structure. The F4 can be used by all sizes of firefighters. The low profile shape packs easily in many bag styles and is available with multiple anchor options.

UL certified to NFPA 1983, 2006 Edition for Escape.
